Birki's[®]

quality shoes made in Germany

Sandals & Clogs 2013

Visit us at: 
www.birki.com

You'll find your favourite Birki's with the following features:

NEW

This footbed consists of a viscoelastic foam, which provides an optimal distribution of pressure and excellent cushioning. Furthermore, it is open-pored, which allows it to absorb moisture and remain highly breathable.

The PU footbed is enjoyably soft because of its millions of air bubbles, is water resistant and perfect for every fun activity – on the beach, in the pool and when out for a stroll.

This footbed incorporates an additional latex cushion, ideal for those who prefer a soft Birki's footbed.

With its extra soft cushioning layer, the soft®base sole provides more comfort when walking on hard surfaces: e.g. stone, concrete and asphalt. It can be recognised by its two colours.

Ideal for all those families who wish to be "coordinated" – these models are available in adult and child sizes.

Your foot needs a bit of leeway on the Birki's footbed. For this reason there are many Birki's models which come in two width sizes: for narrow and for normal feet.

Our Birki's models with Disney designs can be found from page 18 onwards.

The charity shoes in our latest collection can be found on page 16.

Welcome!

Step inside and embark on an exciting journey through the Europa Park in Rust near Freiburg with Birki's. Whether it be fairytale encounters, exciting shows or moments of relaxation – there are lots of surprises in store for young and old! Experience amazing adventures with Birki's at Germany's largest theme park while getting to know our new and varied 2013 collection.

In five sections over the next few pages, we once again offer you many remarkable treasures to discover: for children and adults, with new materials, unusual styles and brightly coloured designs. Enjoy the fantastic Birki's variety!

Have fun browsing, marvelling and conquering.

By the way, you can learn more about the Europa Park at www.europapark.com.

A holiday for your feet...

The anatomically formed Birkis footbed conforms to the natural shape of your feet – it's almost as if you are walking barefoot in the sand. You will walk both more healthily and comfortably, allowing you to do a lot more with your loved ones.

- 1. Heel cup –** the heel area is deepened to mimic a footprint in the sand, providing welcome relief for your back.
- 2. Longitudinal arch support –** keeps your foot firmly in the footbed and makes sure that your weight is evenly distributed.
- 3. Toe gripper –** gives your muscular system a work-out, almost as if you were picking something up with your toes.
- 4. Footbed edging –** enhanced all-round protection to provide your feet whilst keeping them firmly inside the footbed.

... Well-being for the whole body.

The Birkis footbed is not only good for your feet – Your whole body will feel better for it, allowing you to enjoy a more relaxed holiday and benefit more from your free time.

Wellbeing, pure and simple – better balance relieves joints and back.

More fun moving – Birkis encourages the muscles to exercise.

Tension relief throughout the day – the natural rolling movement of your feet when walking is supported on the Birkis footbed.

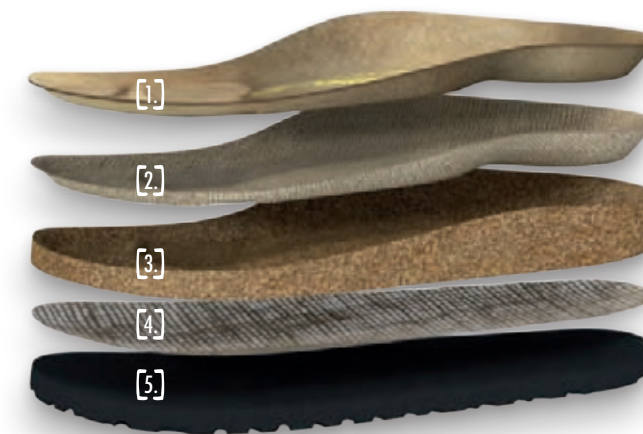

Healthy walking has a positive effect on your body and your well-being.

The classic Birkis cork footbed

It is elaborately produced using natural materials, giving you long-lasting pleasure from your shoe.

1. The **soft suede** caresses your feet – providing an even greater feeling of well-being.
2. The **first jute layer** draws moisture away from your foot – creating a pleasant level of wearing comfort.
3. The heart of the Birkis footbed is the **cork-latex core** – which is inspired by the idea of a foot print in the sand.
4. The **second jute layer** gives the footbed additional stability – every step of the way.
5. And finally, there's the **EVA sole** which is very durable and slip resistant.

NEW **Dynamic** footbed

- ✓ **dynamic pressure distribution**
for optimum stability and comfort when walking
- ✓ **open-pored**
and therefore breathable and moisture-absorbent
- ✓ **excellent resilience**
even in moist condition with "memory" effect

Denoted by the red symbol on the footbed

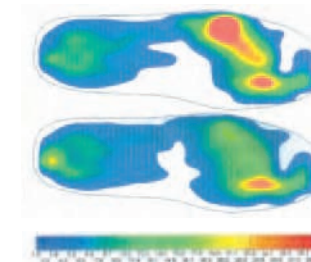

Extraordinary comfort due to viscoelastic foam

This footbed consists of a viscoelastic foam that is also used in the sports shoe industry as a system to stabilize the foot. „Visco“ stands for shock-absorbing or fluid properties and „elastic“ refers to the adaptability of the material.

The dynamic footbed represents a combination of these two properties. This means that the viscoelastic foam gradually yields under stress (viscosity). However, it does not remain this way but returns to its original shape after the stress has eased (elasticity). This way the foam ensures ideal pressure distribution and excellent shock-absorption with each step.

The figure on the right shows the dynamic pressure load without the dynamic footbed on top and with it at the bottom.

2gether.

Birkis

Inseparable companions

Shared family moments are even more fun with the Birkis "2gether" models – ideal for all Disney fans, lovers and even Oktoberfest-goers. The wow factor: The motif on many of the models is divided into two and only becomes apparent when both shoes are positioned correctly next to one another.

Kay – a clog for all occasions

Our popular Birki zoo is moving. The animal motifs are shifting from the "Woodby" clog to the "Kay", which offers the same comfort, as well as optional back straps. If these are not being used, they can now be easily attached onto the front thanks to two slots.

Frayed look

When it comes to our "denim glitter splash" sandals, the frayed edges are part of these shoes' casual look. Those who don't like it can carefully trim the fringes with scissors.

A dollop of glamour

It's not just the stars which twinkle – our new "denim glitter splash" design does too. The textile top material used in the models shown on this double page has been refined with a shimmery gloss coating. Reflective dollops of colour add to the very individual look.

Child-friendly fun with Birkis
Colourful, happy designs, detachable accessories and optional back straps – these features make the models on this double page particularly suitable for children, meaning the little ones can have even more fun with Birkis!

Not just for kids

Some models on this double page are marked with the logo „One style – all sizes“, meaning they are available for adults and children alike. Since the “Tuvalu” sandal is so popular, we’re also offering it in more kids’ sizes.

Unusual structure

The Birko-Flor top material used on the models featuring our new "mexican embossing" design is given an unusual, patterned structure thanks to special embossing. This creates a two-toned look which makes these Birkis real eye-catchers.

Stretch!

The models "Curacao" and "Antigua" are particularly beneficial thanks to the straps made from stretch band – they provide firm support at all times, and adapt wonderfully well to your feet.

street.

Birkis

For adventurous feet

Unusual materials, robustness and an intensified used look make the "street" models absolute all-rounders for all sorts of activities. The new Birkis streetwear also impresses by combining comfort and casualness. Surprise yourself!

„Sail away!“

So diverse!

Our Skippers not only come in textile and leather, but are now also available in two new materials. One of our most popular models now also shows off some of its other sides with robust nubuck and trendy canvas versions – so there's a Skipper to suit all tastes!

Edges are frayed to give these shoes a casual look. Those who don't like this can carefully trim the fringes with scissors.

A different type of Neoprene look...
Neoprene refining also works well on the soft, flexible Birko-Flor top material. It fits snugly around the foot, while maintaining a sporty look. Topstitching also gives the various cork and PU models a robust outdoor style, making them the perfect companions for all leisure activities.

Simply soft!

The aqua soft footbed made from Birki-foam is enjoyably soft because of its millions of air bubbles. It is also water resistant and easy to clean. It's perfect for every fun activity.

Frayed look

When it comes to our jeans leather sandals, the frayed edges are part of these shoes' casual look. Those who don't like it can carefully trim the fringes with scissors.

basic.

Birkis

Our timeless classics

Do you like Birkis which can be combined with virtually every outfit? Then our plain-coloured Basics with classic cuts are perfect for you! Whether sandals or clogs, these models are simply timeless and are guaranteed to impress you.

Really easy to clean!

How you can manage to enjoy your Birkis design clogs in the long run, please read in the following care tips:

- Please clean your clogs only by hand and let them air dry.
- Don't wash them in the washing machine and do not use aggressive detergent.

Thus your Birkis will remain as new!

This cleaning instruction solely applies to our design clogs, all other clogs made of Birki-foam are washable at 60°C.

Profi or Super?

The difference between the Profi and Super-Birki is that the Profi-Birki has a deeper profile and heel section, both of which are robust and waterproof. That's why these clogs are used wherever they're needed, e.g. in the kitchen or even in the garden.

The robust one –

Good for your feet – Good for the environment

All of us here at Birki's feel that anyone who wants to feel good today should also think of tomorrow. For this reason, we ourselves have made a commitment to the following quality and environmental principles:

Health is the priority

The anatomically formed Birki's footbed strengthens muscles and relieves joints and ligaments. To help you to achieve good health we only use natural materials because nothing is more health-giving than that which nature itself provides us with: e.g. cork and rubber.

Environmental protection is our focus

Little waste, no solvents, instead solar technology and energy saving production processes - this is something we value. We strip the cork for our footbeds with the utmost care from the cork trees. We use all of our production waste to manufacture playground and sports ground surfaces.

Good for people

All of us here at Birki's are great supporters of families:

we would like to ensure that everyone, both young and old alike, can enjoy their leisure time unhindered. Therefore, we make every effort to pay close attention from the very beginning to the needs of our customers. We design, develop and manufacture our shoes exclusively in Germany. Our shoe designers have themselves for the most part their own families and, as a result, are fully aware of what it is all about. They only develop Birki's which they themselves would also like their children to wear - with the highest level of quality and using state-of-the art manufacturing technology.

It is our wish that many more generations to come can also be part of the Birki's experience.

The Birki's feel-good materials

When you wear a pair of our Birki's you should experience an overall feeling of well-being and walk more healthily. This is the reason why we also have high standards when it comes to the materials we use.

The basis for our shoes are our cork footbeds. To make these we only use materials which are natural in origin: cork, rubber and jute. They support the natural walking process with their cushioning properties.

For the uppers we mainly use Birko-Flor. This material consists of two layers. The upper layer has a robust structure, while the bottom layer is processed with a soft, skin friendly fleece. With the bathing sandals, we have fused this inseparably with the footbed. In this way, we are able to dispense with adhesives – to the benefit of both your health and the environment.

We also use a range of carefully selected leather types. We coat our cork footbeds with soft, breath-

able suede – creating a skin-friendly environment for the foot.

Our buckles ensure that our models are the perfect fit – holding the foot firmly in the shoe. In order for you to enjoy your Birki's as long as possible, we protect our buckles by applying a powder coating to them.

When working in the garden or enjoying the sea-side, your feet can enjoy a real pampering in our models made of Birki-foam or Birki-cell. Both materials are flexible, water and dirt resistant. Birki-cell is also very light. In addition, the materials are very easy to clean. Please read the cleaning instructions carefully on the respective pages.

The Birki's-website

informative, colourful, clear
